OBJECTIVE

Dynamic Software Engineer with over 1+ year of industry experience in designing and developing scalable backend systems. Proficient in Java, python, C# (.NET), and database management, with a solid foundation in system design and architecture. Passionate about problem-solving, performance optimization, and building efficient, maintainable solutions.

EXPERIENCE

CI GLOBAL TECHNOLOGIES |

Software Engineer

09/2024 - Present | Perungudi, Chennai, India

- **Key member of the Backend team**, managing all **API Development** and overall project coordination.
- **Designed and developed** a new API to **Send bills via Email** to international users, enhancing accessibility and improving user experience across regions.
- **Developed and optimised RESTful APIs** for MeatProteins and Rupos, ensuring seamless integration across mobile, POS, and back-office systems while **improving response times by 15%**.
- **Refactored the entire project architecture to the repository pattern**, enhancing scalability, maintainability, and separation of concerns for better code efficiency.
- **Streamlined backend processes and database performance**, optimizing queries, implementing unit testing, and leveraging **.NET, C#, Python, SQL Server, and Azure** for a robust and secure system.

CI GLOBAL TECHNOLOGIES | INTERNSHIP

Software Developer Intern

07/2024 - 09/2024 | Perungudi, Chennai, India

- **Developed a full-stack To-Do List Web App** using .NET MVC, Python, Entity Framework Core, MySQL, and SendGrid, implementing CRUD functionalities and task assignment features with email notifications to enhance collaboration and productivity.

EDUCATION

KINGSTON ENGINEERING COLLEGE

BE in Computer Science

June 2020 - June 2024 | CGPA: 8.23 / 10.0

TECHNICAL SKILLS

LANGUAGES:

C#[.NET] • Angular • Java[Spring Boot] • C++ • Python
Data Structures & Algorithms

TECHNOLOGIES:

.NET • ASP.NET MVC • MySQL • LINQ

CONCEPTS:

Object Oriented Programming • REST API
Design Patterns

TOOLS:

Fork • Git • Swagger • Postman • Vim • **GitHub Copilot**
• **Claude** • **AI Prompting**

PERSONAL PROJECTS

TASK-MANAGEMENT API

ASP.NET MVC | C# | SQL | EF Core | JWT | Docker

- Built a RESTful Task Management API using ASP.NET Core with full CRUD, JWT auth, and role-based access control. Followed SOLID principles and tested endpoints using Postman.

TODO-LIST WEB APPLICATION

ASP.NET MVC | C# | Python | Flask | SQL

- To-Do List Web App with CRUD and Task Assignment Features with Emailing Task Features.

BUDGET TRACKER API

Java | Spring Boot | MongoDB | JWT | Postman | JUnit

- Developed a **RESTful API** for tracking personal expenses, categorizing transactions, and generating monthly/annual reports.
- Integrated **Spring Security with JWT** to enable secure, role-based access to endpoints.

ACHIEVEMENTS

- **Secured 2nd position** in the Hackathon conducted by IBM.
- Led backend module development in a team of 3, ensuring timely delivery and clean, scalable architecture.

CERTIFICATES

- [Full Stack with Python - GUVI - \(08/23 - 10/23\)](#)
- [Introduction to Cloud - IBM - \(01/23 - 05/23\)](#)
